

PRIYA SHARMA

DATA SCIENCE | MACHINE LEARNING | DATA ANALYTICS

priya.sharma.ds@gmail.com | +91-9876543210 | linkedin.com/in/priya-sharma-ds | github.com/priya-sharma-ds

PROFESSIONAL SUMMARY

Data Science enthusiast with hands-on experience in Python, SQL, statistics, machine learning, data visualization, and exploratory data analysis. Skilled in transforming raw datasets into useful insights, building predictive models, and communicating results through dashboards and visual reports. Interested in solving real-world business problems using data-driven approaches.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

ABC Institute of Technology, India | 2023

TECHNICAL SKILLS

Programming	Python, SQL, R, C++
Data Science	Pandas, NumPy, SciPy, Scikit-learn, Statistics, EDA
Machine Learning	Regression, Classification, Clustering, Feature Engineering, Model Evaluation
Visualization	Power BI, Matplotlib, Seaborn, Excel
Databases	MySQL, PostgreSQL, MongoDB
Big Data	Apache Spark, PySpark
Tools	Jupyter Notebook, Git, GitHub, VS Code

EXPERIENCE

Data Science Intern | Insight Analytics Pvt. Ltd. | Jan 2023 – Apr 2023

- Cleaned and analyzed customer and sales datasets using Python, Pandas, and SQL.
- Performed exploratory data analysis and identified trends, anomalies, and key business patterns.
- Built and evaluated machine learning models for classification and prediction tasks.
- Prepared visual reports and communicated findings to the analytics team.

Data Analyst Intern | DataVista Solutions | May 2022 – Jul 2022

- Wrote SQL queries to extract, aggregate, and transform business data.
- Created Power BI dashboards to track sales, revenue, customer segments, and performance KPIs.
- Automated recurring data preparation tasks using Python and Excel.

PROJECTS

Customer Churn Prediction

- Developed a machine learning pipeline to predict customers likely to leave a service.
- Performed data preprocessing, categorical encoding, feature selection, and model comparison.
- Compared Logistic Regression, Random Forest, and Gradient Boosting using precision, recall, and F1-score.

Sales Analytics Dashboard

- Built an interactive Power BI dashboard for sales, revenue, product performance, and regional analysis.
- Used SQL to transform and aggregate transactional data before connecting it to Power BI.
- Created KPI cards, trend analysis, category-level comparisons, and interactive filters.

House Price Prediction

- Built a regression model to estimate house prices from property and location-related features.
- Performed exploratory analysis, outlier treatment, feature engineering, and model evaluation.
- Evaluated model performance using MAE, RMSE, and R².

Customer Segmentation

- Applied K-Means clustering to identify customer groups based on purchasing behavior.
- Used exploratory analysis and cluster visualization to understand customer characteristics.
- Provided segment-level insights that can support targeted marketing strategies.

CERTIFICATIONS & LEARNING

- Data Science with Python: Pandas, NumPy, Statistics and Machine Learning
- SQL for Data Analysis: Joins, CTEs, Window Functions and Aggregations
- Power BI: Dashboard Design, Data Modeling and DAX Fundamentals
- Machine Learning: Regression, Classification, Clustering and Model Evaluation

ACHIEVEMENTS

- Built multiple end-to-end data science projects using real-world datasets.
- Created portfolio projects combining SQL, Python, machine learning, and Power BI.
- Regularly practice data analysis, SQL, and machine learning problems.

ADDITIONAL INFORMATION

Areas of Interest: Data Science, Machine Learning, Business Analytics, Predictive Modeling, Data Visualization, SQL Analytics

Languages: English, Hindi

Target Roles: Data Scientist, Data Analyst, ML Engineer, Business/Data Analyst
